Friday	08:00 - 18:00	Saturday	10:00 - 14:00
Sunday	Closed		

DESCRIPTION

Finished in Royal Blue with Magnolia hide, piped dark Blue and equipped with automatic transmission, sports suspension and AP braking upgrades. Also fitted are Vantage specification 16" polished road wheels and Michelin Pilot Sport tyres, combining to improve both safety and overall performance.

First registered in 1987 and rare to market, the Aston Martin V8 Volante equipped with electronic fuel injection, was produced toward the end of V8 production for just 3 years and delivered greater power and torque, than its predecessors. Only 216 were built before production of the V8 ceased, with the majority configured in left hand drive for export to the USA.

The pleasing example we are offering, originally supplied by HWM of Walton on Thames, remained with the first owner for some 20 years. Maintained by Aston Martin Works and Aston Martin agents, prior to a bare metal re-paint, from Black to the Royal Blue and chassis restorative works being carried out. Last changing hands in 2016, the car has subsequently been lightly used and carefully stored.

Endowed with more power and torque than the previous generation V8 Volantes, the EFI is distinguishable in having a lower bonnet line than earlier Volante's, allowing improved forward visibility to complement the enhanced performance.

Offered inclusive of a well-documented service history file, including all MOT certificates, service invoices and photo records of the bare metal repaint and chassis works. Now with a total of 49,260 miles covered, this highly attractive V8 Volante is being offered inclusive of full preparation, a manufacturers scheduled service, 12 months MOT and warranty.

Available for viewing and demonstration now at our Hertfordshire showrooms.
