DESCRIPTION

2019 ASTON MARTIN VANQUISH ZAGATO SHOOTING BRAKE #71 of 99

We are thrilled to offer to market, this sensational 2019 Vanquish Zagato Shooting Brake, finished in Scorching Black over Metallic Black hides with Spicy red contrast stitching and presented in 'as new' condition, as befits the mileage of just 27 miles from new!

Unveiled to great acclaim at the prestigious Monterey Car Week in August 2017, the Vanquish Zagato Shooting Brake was the then latest creation from the long-standing partnership with the Italian design-house, Zagato and which completed the quartet of Vanquish Zagato's, alongside the Coupe, Volante and Speedster models.

The Vanquish Zagato Shooting brake production run was limited to just 99 cars worldwide, with 48 in right hand drive.

The Vanquish Zagato Shooting Brake was based upon Aston Martin's highly successful Vanquish S model that utilised their VH chassis architecture, mated with a 6.0 litre V12 engine, in this model tuned to produce 595bhp, capable of propelling the car to a 0-60mph time of 3.5sec. Bodied entirely in Carbon Fibre, the Vanquish Zagato incorporates many of the design houses signature styling cues such as the 'double bubble' roof and large front grille, built with the exquisite 'Z' pattern. At the rear, the bladed LED lights provide a futuristic look.

Not only sublime to look at, the Vanquish Zagato Shooting Brake is also sensational to drive, courtesy of; the most powerful engine available, the lighter weight, as a result of the extensive use of carbon fibre, the 8-speed Touchtronic III ZF gearbox, adaptive damping and incredible stopping power from its Carbon Ceramic brakes.

The Shooting Brake is still a strict two-seater, but one conceived as an individual and exceptionally practical GT. The extended roof bears the iconic Zagato 'double-bubble' surfacing complete with glass inlays to let light flood into the cockpit.

This Villa D'Este Pack equipped example, #71 of 99, is specified with numerous optional extras including; Red brake calipers, black textured exhaust tailpipe finishers, full length twill carbon fascia trim, Shadow bronze/anodized Gold interior finish pack, One77 full leather steering wheel, carbon fibre roof panels, bronze side strakes, carbon fibre side fenders, Multispoke Shooting Brake Bronze tinted diamond turned wheels and Black side window finishers. A full build specification is available on request.

First registered in April 2019 and acquired by our client in October 2023, this car is in immaculate, 'as new' condition throughout as befits the 'delivery' mileage. Benefitting from annual servicing, at Aston Martin Main agents, this car will be supplied to its next custodian freshly serviced, with 12 months MOT and 12 months warranty.

Supplied with all keys and owner's manual and original umbrella.

When considering an original purchase price of over £600,000 and given the depreciation curve followed by previous limited edition Zagato Aston Martin models, combined with the inflationary effect on prices of new Aston Martin models, this car may well now represent superb value.

One of the most dramatic cars of the last decade, very sensible to own and maintain and likely to become a highly collectible. A fitting way to end the glorious VH chassis platform / V12 engine era.

Available for viewing now at our Hertfordshire showrooms.
